Community Care Guide

2024

As we get older, lots of us may start to feel a bit unsteady on our feet and become worried about falling. But there are simple things you can do to help yourself feel more confident and avoid a slip or fall.

Steps to staying steady (Age UK)

This handy checklist runs through 8 key things you can do to help avoid a fall.

1. **Stay active** - Focus on activities that challenge your balance and strengthen your legs and upper body, like walking, gardening or dancing.
2. **Check your sight and hearing** - Go for regular sight tests and report any hearing difficulties you have to identify any problems that may be affecting your balance.
3. **Look after your feet** - Wear well-fitting shoes and slippers and tell your GP or chiropodist about any foot problems
4. **Ask about your medicines** - Certain medicines can make you feel faint or affect your balance. Let your GP or pharmacist know if you ever feel like this.
5. **Get enough vitamin D** - Vitamin D is essential for keeping your bones strong – the best source is sunshine.
6. **Eat a calcium-rich diet** - Calcium helps to keep your bones strong. Good sources are dairy foods, fortified soya products and canned fish with bones.
7. **Check for hazards at home** - Make sure your home is hazard free and well lit.
8. **Visit your GP** - If you've had a fall or you're feeling unsteady, tell a healthcare professional, such as your doctor – even if you feel fine otherwise. There are many reasons why you might be feeling unsteady, and there are ways to help you feel more confident.

Forever Active

Forever Active is a programme supporting active ageing, focusing on improving strength and balance through exercise and making activity part of your everyday life. Our team will be able to discuss your interests and signpost you to social activities which take place in community venues.
