Fraud Advice

Door-to-Door Fraud

Door-to-door scams involve criminals knocking on your door and unexpectedly offering products or services. Fraudsters convince you to pay for goods or work which is often overpriced, of poor quality or is not even carried out. In many cases, this work is not necessary. They may use intimidation and pressure you to make quick decisions so that you agree to their demands.

Criminals may try to convince you that work is urgently required and the price they are charging is fair. They will put pressure on you to have the work done immediately and may ask for payment upfront. Often the work is not completed, or if it is, the work is to a poor standard. You may also be overcharged for any work done.

They can use deception to convince you:

- Claiming they were working on a neighbours' address and noticed you need work completed and they have left over materials.
- They may inspect areas you can't access, for example the loft or roof and show you photos or videos claiming they are evidence that you need the urgent repairs. Beware of these tactics as these images may not even be your property.
- They may throw water down when you are not looking to indicate you have 'damp'.

- They may be insistent you pay in cash immediately or put down a deposit, even offering to take you to the bank to get the money. If you do this, they may continue to find reasons for you to pay more money.
- Some callers will be legitimate. Gas, electricity and water companies may visit to read your meters. Charities may visit to ask for donations and council officials may contact you regarding local issues. Always ask for identification and tell them to wait outside whilst you check this by calling the company or speaking to a relative or friend. If you are calling the company, don't use the phone number on the person's ID card).

How to protect yourself

- Always check their identity. If you are not happy about a person's identity, do not let them into your house under any circumstances.
- Never leave your front door open/unlocked and unattended, so a second individual can't enter without your knowledge.
- Take time to consider your options and research costs from other providers. If in doubt contact your local Trading Standards.
- If you feel pressured by any cold caller, have the confidence to be firm and say no.
- Call the citizens advice consumer helpline following a doorstep caller on 03454 04 05 06.

REMEMBER - Take time to consider your options. Don't be pressured into making a quick decision.

CAUTION - Never pay upfront for goods or services you have not received.

THINK - Are they a legitimate company? Why haven't they given you a written quote?

Investment Fraud

Investing in stocks and shares or any other commodity can be a successful way of making money. However, it can also lead to people losing their entire life savings. Fraudsters will persuade you to invest in all kinds of products. They will offer you high rates of return, particularly over longer periods of time, which often do not exist.

Common products that will be offered include binary options, virtual currency, carbon credits, wine, rare metals, gemstones, land and alternative energy. Often, initial investments will yield small returns as an incentive to invest further funds. However, larger investments or cashing out will be met with excuses or a penalty charge. Eventually contact with the fraudster will be impossible and all funds and bogus returns lost.

Fraudsters are organised and they may have details of previous investments you have made or shares you have purchased. Knowing this information does not mean they are genuine.

Criminals may direct you to well-presented websites or send you glossy marketing material. These resources do not prove they are a genuine company. Many fraudulent companies have a polished customer image to cover their illegal activities.

It is relatively easy to register a company with Companies House. This does not confirm or endorse that they can provide genuine investments. Indeed, emerging investment markets may be unregulated, making these open to abuse.

Companies may be registered at prestigious addresses, for example Canary Wharf or Mayfair. This does not mean they operate from there. It is an accepted business practice to rent such a virtual office to enhance a business's status. However, fraudsters are also aware of this and exploit it. The fraudster may put pressure on you by offering a 'once in a lifetime opportunity' or claim the deal has to be done quickly to maximise profit.

In addition - be wary of companies that offer to 'recover' any funds you have lost to any sort of investment scam. They may be linked to the company who initially defrauded you in the first place and may be targeting you again. This is known as 'Recovery Fraud'.

Many different types of Advance Fee Fraud using various techniques and scams are used by criminals. Some of these (including Romance Fraud and Recruitment Fraud) are covered more in-depth later in this book. However, the numerous different tactics used by criminals means it's worth describing the basic technique behind the fraud; the criminal will offer something to you, but in order to progress, you'll need to pay something up front.
