

KEEP IT SAFE

Where do you store your family gold and jewellery?

Thieves want to steal your valuables from your home. If you have a large amount of family gold or jewellery in your home, consider following these steps to keep your valuables safe:

Keep your windows, doors, and porches locked even when you are at home.

Never hide cash or jewellery in your bedroom as this is the first place a burglar will look. Lock it away and keep it out of sight.

We are here to keep you safe. Report any unusual activity to us on 101. Always call 999 in an emergency.

Buy a fire-rated safe to store your jewellery, cash, and other valuable items. Be sure to bolt this to the floor or wall.

Secure UPVC/composite doors by upgrading standard euro-cylinders to 3-star TS007 anti-snap locks. These offer maximum protection against forced entry.

Find a police-accredited safe today

Take photos of all jewellery and register them on the Secure Asset Register.

If you have a large amount of family gold or jewellery, you may want to consider using a safety deposit vault. Contact your insurance company should you opt for this, as it may impact on your current policy and premium.
