3 Arrests

Additional 11 outside of
boundary

Intelligence Submissions

The CHB team proactively began gathering intelligence ahead of the formal adoption of Croylund to ensure a strong and effective start. Following the area's formal adoption in March, the team has continued to build on this work through active patrols and ongoing engagement with residents.

As a result of this work, 92 intelligence logs have been received that are directly linked to the CHB area. In addition, the team has submitted a further 104 intelligence logs which, although falling outside the CHB geographical boundaries and therefore not reflected in this dataset, continue to support wider intelligence development, particularly in relation to identified and potential priority nominals.
