The Herbert Protocol is a safeguarding measure designed to help locate and protect vulnerable individuals, particularly those with dementia, in the event they go missing. It involves gathering detailed personal information, including medical history, a photograph, and details of places the person may be familiar with, to assist the police and community in finding them quickly and safely.

This proactive approach can be crucial in ensuring the safety and well being of those living with dementia.

If you know someone who could benefit from having a Herbert Protocol form completed, especially if they are living with dementia or another condition that makes them vulnerable to going missing, contact your PCSO for assistance to complete -
